INSTALLATION INSTRUCTIONS

For Model 72427-212 (Rev. 03/07/2014)

READ AND SAVE THESE INSTRUCTIONS

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.

PREPARING FOR INSTALLATION (Fig. 1)

1. Shut off the power at the circuit breaker and remove the old fixture, including the mounting hardware.
2. Carefully remove the fixture from the carton and check that all parts are included as shown in the illustration.
3. Attach the circular strap (A) to the outlet box using the mounting screws (B) (Size: #8-32N*L0.5”). The side of the circular strap (A) marked “GND” must face out.
4. Install 2 studs (C) into the circular strap (A), spaced the same distance apart as the holes in back plate (D).
5. The support cable is provided to support the weight of the fixture while wiring. Align the fixture to circular strap (D) and attach hook (K) on the end of support cable (J) into a slot located on circular strap (D). Carefully allow the support cable (J) to support the weight of the fixture while wiring. (Fig 1)

CONNECTING THE WIRES (Fig. 2)

6. At this point, connect the electrical wires as shown in figure 2, making sure that all wire connectors are secured. If your outlet has a ground wire (green or bare copper), connect the ground wire from the fixture to it. Otherwise, connect the ground wire from the fixture directly to the circular strap and secure with the green screw provided. After wires are connected, tuck them carefully into the outlet box.

COMPLETING THE INSTALLATION (Fig. 1)

7. Align back plate (D) onto studs (C) and secure with cap nuts (E).
8. To prevent moisture from entering the outlet box and causing a shortage, use clear caulking (i.e. Indoor/Outdoor silicone sealant) to outline the outside of fixture back plate where it meets the wall leaving a space at the bottom to allow moisture a means to escape (Fig.3).
9. Pull up latch (F) and open the door.
10. Place the plastic covers (included in mounting hardware bag) over the glass holder clips.
11. Install glass (H) using the glass clips on frame (G). Note: The rear glass must be installed first, followed by the side glass. The front glass should be installed last.
12. Install 4*60W B10.5 bulb (s) (not included) in accordance with the fixture’s specification. **(DO NOT EXCEED THE MAXIMUM WATTAGE RATING!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).**
13. When replacing the glass (H), pull up latch (F) and open the door. Loosen the clips and remove glass (H). Note: The side glass must be removed before the rear glass. After replacing the glass, repeat step 9, and then close the door.
14. For installing or replacing bulbs at a later date, pull up the latch (F) and open the door. (Fig.1)

Your installation is now complete. Return power to the outlet box and test the fixture.

Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.
